

# NYLON CLAMPS

Nylon clamp is one of the fastest, easiest and most economic solutions of flexible air duct fixation on branch pipes and suits well for fixation of any air duct systems.

Clamps are made of high quality durable material with high mechanical resistance and long service life.

Due to ridged locking device the clamps are suitable for any diameter. Available in modifications from 370 up to 1220 mm length and from 4.8 mm up to 9 mm width. To facilitate mounting we offer a special tightening and cutting device NZC.

## Technical data:

- Temperature operating range: . . . -40°C up to +85°C
- Material: . . . . . Nylon 66
- Elongation: . . . . . 70%
- Fire resistance: . . . . . self-extinguishing in case of flaming (certified UL 94V-2)
- Standard colour: . . . . . white

Tightening and cutting device NZC
